Job Description:

Job Purpose: *Briefly state overall objectives of the job*

Position provides field service solutions to our clients, ensuring timely response and reliability in the maintenance, repair and overhaul of gas turbine generator, compressor and mechanical drive packages and supporting ancillaries. Extensive travel is a significant part of this role.

Key Responsibilities and Duties:

- ◆ Provides dedicated field service support for the following services offered by the company:
 - Performs package mechanical and electrical systems planned and corrective maintenance
 - Problem shooting and rectification
 - Instrumentation and control systems inspection and maintenance
 - Installation and commissioning
 - Generates and submits timely field service reports
 - Performs onsite emissions testing
 - Conducts DLN tuning
 - Conducts vibration surveys and analysis
 - Performs field repairs of driven equipment, pumps, compressors and generators
 - Gas Turbine Engine removal and installation
 - Performs onsite emissions testing
 - On-site customer training
 - Condition monitoring
 - Control system retrofit and upgrade
 - Integrity reviews
 - Performs limited operations of gas turbine equipment
 - Any and all other duties as assigned by the Field Service Manager, including the possibility of occasional workshop-based activities.
 - Provides technical support and instructional training as needed to company's field service representatives.

Qualifications and/or experience:

Experience

- ◆ Minimum of 5 years technical experience performing onsite maintenance, troubleshooting, and repair of Solar gas turbines and their associated compressors and generators.
- ◆ Minimum of 2 years experience with PLC control systems (Allen Bradley PLC 5, RS/Logix 5000, Turboelectronics)

- ◆ Experience in a similar industry is strongly preferred

Qualifications/Skills

- ◆ High school education or equivalent
- Additional formal or college level training in I&C and mechanics is a plus

Knowledge/Skills:

- ◆ Proficient knowledge of Dry Low NOx gas turbine combustion systems (DLN/SoLoNOx)
- ◆ Proficient Knowledge of electrical and PLC control systems (AB PLC 5, Turboelectronics, RS/Logix 5000)
- ◆ Knowledge of high-speed rotating equipment
- ◆ Interpersonal/Written & Oral Communication Skills essential.
- ◆ Fully competent in Microsoft Office Suite.

Personal Qualities:

- Customer Service ethic, with focus on responsiveness excelling both internal and external customer satisfaction.
- Flexible attitude; ability to work with diverse personalities
- Dedicated to continuous improvement, quality service, and HSE

Physical Requirements: *Please state the physical requirements to perform the essential functions of the role*

Physical Evaluation

Pulmonary Test

Respirator Medical Evaluation & Qualitative Fit Test

Working in Extreme Temperatures

Able to Lift / Handle at least 70 pounds
