Position Title: **Regional Manager (Rig Operations)**
Classification (Full Time or Contract) Full Time / US Citizen / US Green Card Holder only
Location: New Town, North Dakota
Education Requirements:
Experience Level: 5 + years experience in Rig Operations

Job Description:

Immediate opening for an ambitious, proactive, motivated leader with expertise in completions and multi-state Well Service operations. It requires someone who is versatile and knowledgeable in all types of drilling equipment including the maintenance and repair of rigs and pumps. As part of the management team this person will be responsible for the day-to-day management of drilling operations within the designated region and will report directly to the Vice President – Well Servicing.

The primary responsibility of this position is to prepare and coordinate all operational projects (people and equipment) within the specified timetable, budget and agreed quality criteria to include adherence to a strong safety policy. This person will also formulate and implement improvement processes and operating policies, with the approval of the Vice President – Well Servicing.

KEY:

Must have the ability to manage current operations and customers while expanding growing multi-state completions and well services operations in a company culture of "employees first."

Essential Duties and Responsibilities include the following (other duties may be assigned as may be determined by executive management):

- Responsible for the day-to-day drilling operations within a multi-geographical area.
- Liaison between operator's local management group and Company Services to insure clients work over program is successfully completed within predetermined metrics.
- Coordinates all rig and equipment movement into and within his area in a timely manner in keeping with efficient workflow schedules, etc.
- Reviews, approves and submits requests for equipment, materials and spare parts to Vice President – Well Servicing.
- Coordinates all shipments once approved by corporate management.

- Confers and cooperates with other management personnel in formulating administrative and operational policies and procedures. (Best Practice Teams to adhere to at or above industry standards).
- Insures operations are conducted in a safe and professional manner in accordance with company's safety, health & environmental prevention programs, preventive maintenance programs and operation policies and procedures, as determined by executive management.
- Responsible for and participates in training of rig personnel in proper work related activities to include an emphasis on stringent safety practices.
- Acts as liaison between corporate management and client management personnel
